

Welcome to the

SILVER STATE OFF-HIGHWAY VEHICLE TRAIL

The Silver State Off Highway Vehicle Trail was developed by the BLM, with the help of public citizens, and is the first congressionally designated OHV trail in the Nation! This unique trail is managed by the BLM for your safety and enjoyment. Please ride responsibly to help preserve your public land recreation resource.

This trail was designed for a ride the whole family can enjoy. The trail winds its way up mountains where pinyon and juniper trees are scattered along the steep rocky slopes. These high hills provide for some great photographic opportunities with big game animals such as elk, deer, and mountain lions all calling these mountain top islands home.

We need a higher res photo. This is as large as we can make this photo without losing resolution.

the vegetation turns to sagebrush and other low lying shrubs. The vast open expanses of the valleys provide for solitude and increase your chances of spotting antelope and golden eagles soaring overhead.

For more information on the Silver State Trail or to learn how to get involved please contact the Caliente BLM Field Office at 775-726-8100
