

## MOUNTAIN BIKING TRAILS

### BARNES CANYON TRAILS

A network of singletrack for riders of all skill levels and interests. Ride the flow, tackle the tech, or drop some gravity moves—it's all here.

This network is only 4 miles from Caliente, with many miles of completed trails to keep you on singletrack all day long. The area's terrain, beauty, and climate combine to create an unrivaled mountain biking experience.

### ELLA MOUNTAIN TRAIL

The Ella Mountain Trail starts near the historic Ella Mountain fire lookout—the last active lookout tower in Nevada—at an elevation of 7,300 feet. The singletrack trail descends 21.5 miles through stunning scenery, including ponderosa pine stands, manzanita thickets, exposed rock outcrops, and juniper forests on its way back toward Caliente. Paddling is required. Leave your downhill gear at home. This trail can be ridden top-to-bottom, or you can set up a shuttle and ride it in sections. Regardless of which option you choose, be prepared for a long day out in remote wilderness. The unique scenery, diverse landscape, and high-quality trail make this a one-of-a-kind experience.

### CALIENTE BIKE SKILLS PARK

The Caliente Bike Skills Park and Trails provide a range of fat fun in a structured setting. Develop mountain biking skills at the skills area at the Super Park. Then ride two miles of beginner, intermediate, and advanced trails on the adjacent hill. These trails offer an incredible experience for all levels.

Now open to the public, the Caliente Bike Skills Park and Trails are the perfect complement to the other trails in the area.

### KERSHAW-RYAN TRAILS

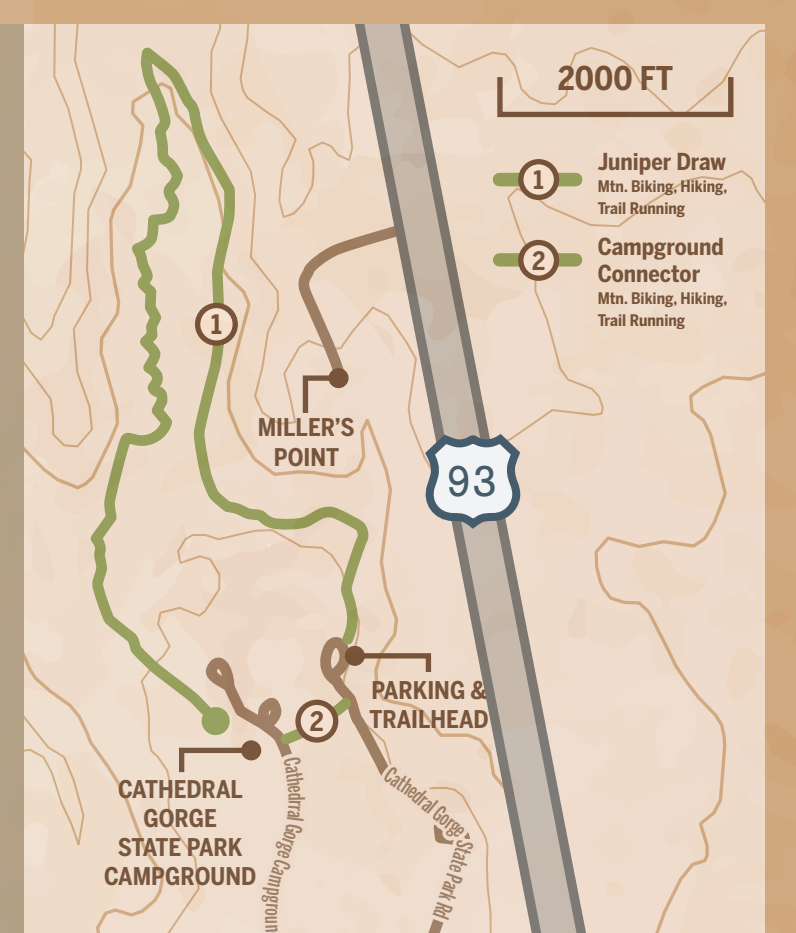

This sweet set of stacked loop trails has flow for days! Choose your mileage and hang onto your helmet. Beginner, intermediate, and advanced riders alike love these trails for their banked turns, incredible views, and optional play features.

New in 2020 is a black diamond downhill trail—the perfect addition to this network. Just minutes from town, Kershaw-Ryan State Park is the perfect spot for a quick spin or an hours-long flow session.

### JUNIPER DRAW LOOP

Follow the fat windy trail along spires and old canyons that form the perimeter of the gorge in this three-mile loop at Cathedral State Park.

## SUGGESTED OHV ROUTES OUT OF CALIENTE

Here are the suggested adventure loops featured at the 2019 Nevada OHV Summit. These routes and mileages highlight some of the beautiful terrains in and around the area and show ideas for good day trips out of the City of Caliente.

Downloadable maps and data, along with detailed instructions are available at <https://ohv.nv.gov/trails/Caliente-Area-Suggested-Trails>
